

Description	Pages
SECTION 1 – GENERAL INFORMATION	
1. Definitions – Edit definitions for Consulting Engineer, Developers, Municipal Engineer and Professional Engineering to include P.Tech.	MH 2016 1
2. General	3
3. Engineering Components	4
4. Municipal Improvements	5
5. Servicing Agreements	6
6. Canada Post Mailboxes	11
7. Alberta Environment Protection – Standards & Guidelines for Municipal Waterworks, Wastewater & Storm Drainage Systems in Alberta	11
8. Submission of Engineering Design	14
9. Preliminary Design Review	15
10. Final Design Review	15
11. Right-of-Way Documents	15
12. Utility Crossing Agreements	15
a. Sample Application Letter	17
b. Sample City Confirmation Letter	19
c. Alberta Environment Fact Sheets and Application Forms	21
d. Extending Water Distribution and Wastewater Collection Systems	22
e. Written Notification for Extension to a Waterworks, Wastewater, or Storm Drainage	23
f. System Application for a Letter of Authorization for Storm Drainage Treatment Facilities	24
g. High Pressure Gas Main Application	25
h. Sample Utility Alignment & Utility Right-of-Way Approval Letter	26
SECTION 2 – CONSTRUCTION AND AS-CONSTRUCTED DRAWING STANDARDS	
1. General	1
2. Construction Drawing Requirements	1
3. Construction Drawing Plan Requirements	4
4. Plan/Profile Construction Drawing	12
5. Submission of Proposed Construction Drawings	15
6. Changes (Revisions) to Approved Construction Drawings	16
7. As-Constructed Submissions	16
8. Digital As-Constructed Drawing Standards	19
9. Future Standard Revision Updates	21
SECTION 3 – CONSULTANT GUIDELINES	
1. General	1
2. Consulting Engineer/City/Aquatera Relationship	1
3. Requirements Prior to Construction – Update	2
4. Requirements During Construction	3
5. Post-Construction Requirements	7
a. Inspection Check Lists	12
SECTION 4 - Blank	

SECTION 5 – ENGINEERING DESIGN AND SUPPLEMENTARY REPORTS

1. Introduction		1
2. Content		1
3. Design Report Submission Requirements		2
4. Supplementary Report Submission Requirements – address riparian setback matrix and clarify top of bank setback criteria	KD 2015	12
5. Add section on Biophysical Report Standard Requirements	LW 2016	

SECTION 6 – EROSION AND SEDIMENT CONTROL MEASURES

1. Erosion and Sediment Control Objectives - Consider replacing Erosion and Sedimentation Plan with ECO Plan Framework	KD 2016	1
2. Reference Material		1
3. Regulatory Requirements		2
4. Penalties for Contravention of Environmental Legislation		10
5. Introduction for an Erosion and Sediment Control (ESC) Plan		17
6. Best Management Practices (BMPs) for Erosion and Sedimentation Control		20 23
7. Erosion and Sediment Control (ESC) Report and Plan		27
a. ESC Plan Checklist		

SECTION 7 – SITE CLEARING AND GRADING GUIDELINES

1. General		1
2. Regulatory Requirements		1
3. Submissions for a Clearing and Grading Plan		1
4. Special Conditions		2
5. Topsoil Stockpiles and Disposal		3
6. Stormwater Management Facilities		3
7. Erosion and Sediment Control Measures		4
8. Rehabilitation of Adjacent Lands		4
9. Deep Fills Geotechnical Report		4
10. Construction Completion and Final Acceptance		4

SECTION 12 – STORM DRAINAGE SYSTEM

1. General		1
2. Minor System		1
3. Major System		15
4. Stormwater Management Facility Design		38
a. Hyetograph		

SECTION 13 – UTILITIES

1. General		1
2. Costs		2
3. Detailed Design Drawings		2

SECTION 14 – ROADWAY DESIGN STANDARDS

1. Geometric Design Standards		1
2. Vertical Alignment		1
3. Horizontal Alignment and Intersection Design Elements		3
4. Cross-Sections – Add clarity around coloured and stamped concrete and where/when it's required along arterial roads	AM 2016	4
5. Pavement Structures		5
6. Cul-de-Sacs		9
7. Rear Lanes and Alleys		9
8. Emergency Access Design Requirements		10

9. Driveways – need separate document to address, include max approach grades	10
10. Temporary Roads	11
11. Pavement Marking and Traffic Control and Street Name Signs Table 1 Roadway and Geometric Design Elements Table 2 Roadway Design Elements	12
SECTION 15 – LOT GRADING	2015
1. Purpose of Section	
2. Surface Drainage on Private Property	
3. Lot Grading Design Requirements	
4. Use of Swales – clarify lot grading swales (must run through all properties, not just after three properties when draining more than three lots)	AM 2016
5. Content of Lot Grading Plans	
SECTION 16 – LANDSCAPING	
1. General	1
2. Landscaping Plan and Playground Plan if Applicable	3
3. Design Guidelines	4
4. Design Requirements	13
5. Testing	17
SECTION 17 – PARKS	
1. General	1
2. Park Categories	1
3. Landscape Plan	4
4. Design Requirements	4
5. Playground Design	6
6. Outdoor Rinks	9
7. Toboggan Hills and Berms	10
8. Informal Playing Fields	10
9. Formal Sports Fields	11
SECTION 18 – <i>Blank</i>	
SECTION 19 – TRAFFIC SIGNALIZATION	
1. General	1
2. Pedestrian Timings – adjustments to walk times and distances	2
3. Vehicle Timings – adjustments to green, amber and red timings	3
4. Other Timing Parameters	4
SECTION 20 – DESIGN DRAWINGS TABLE OF CONTENTS	214
